Zero Carbon Resorts in the Philippines receives Austrian Green Planet Building® Award

Sustainable building "Made in Austria": low resource consumption and energy self-sufficiency

The residential and tourism building in Puerto Princesa, Philippines, offers a high level of comfort. From construction to operation, the focus was on regionally available materials such as bamboo, palm leaves, wood and clay. Energy-efficient technologies such as a small biological sewage treatment plant and a PV system are used. Collected and purified rainwater is used for showers and toilets. GrAT is planning further demonstration buildings in Thailand and Nepal.

Energy efficiency and the supply of renewable energy are the focus of **Austrian Green Planet Building®** (AGPB). AGPB transfers the objectives and strict criteria of the national climate protection initiative **klimaaktiv** for the building and real estate industry to an international level. The outstanding achievements of Austrian planning offices, consultants, construction companies and production plants abroad in the field of sustainable building – Austrian Green Planet Building® distinguishes them.

AGPB is an umbrella brand supported by the Federal Ministry for Climate Protection, Environment, Energy, Mobility, Innovation and Technology and AUSSENWIRTSCHAFT AUSTRIA.

Zero Carbon Resorts in Puerto Princesa, Philippines, receives the Austrian Green Planet Building® Award: Low resource consumption and focus on regional materials during construction as well as the sustainable, energy-efficient and energy-independent operation of the resort point the way for resource-saving tourism buildings.
